CANADIAN STATISTICS.

CENSUS OF 1890-91.

INTRODUCTION.

VOLUME THIRD.

The Third Volume is devoted to the Industrial Establishments of the country.

The Census definition of an industrial establishment is, "Any place where one or several persons are engaged in manufacturing, altering, making up or changing from one shape into another, materials for sale, use or consumption."

This definition is the one which guided the enumerators in the census of 1891, and also in the censuses of 1881 and 1871.

The object aimed at in each of the three census-takings is the same, viz., to obtain full statistics of the small as well as the large industries of the country. The chief characteristic of the country's development during the decade 1881-90 appears, from the returns of the census enumerators, to be the up-springing of numerous small industries. This was a characteristic of the country's growth in 1881, but was not so marked as was shown in 1891.

The Statistical Division of the Department of Agriculture has exercised great care in compiling the returns of the enumerators. Many small industries were returned but were cut out of the tabulated statement herewith presented, because they were evidently adjuncts to the regular occupation, rather than the occupations by which livelihoods were obtained. In this respect the lines of previous censuses were closely followed, the object being to make the census of 1891 strictly comparable, in its general results, with those of 1881 and 1871.

The returns herewith given, do not include such products as are made at home for family use, as woollen and linen cloth. Butter and cheese made at home are not included in the products of the creameries and cheese factories given in the present volume.

The magnitude of these industries will appear from the fact that 4,320,838 yards of cloth and flannel, 633,724 yards of linen, 111,370,210 pounds of butter and 6,267,203 pounds of cheese were reported by the census enumerators as having been made in the homes of Canada but these are not included in the returns of industrial establishments.

Furniture, boots and shoes, etc., made in the houses of Canada during "off-hours" are not included.

On the other hand dress-making and millinery, carried on by persons who make their living by so doing, have necessarily to be given their legitimate place in a census which aims to present as fully as possible the results produced by the wage-earners of the land in making their living.

One great feature in the returns of industrial establishments for 1891 is the specialization which had taken place.

STATISTIQUE DU CANADA.

RECENSEMENT DE 1890-91.

INTRODUCTION.

TROISIÈME VOLUME.

Le troisième volume est consacré aux établissements industriels du pays.

La définition d'un établissement industriel, dans le manuel du recensement, est :—
“Un local quelconque dans lequel une ou plusieurs personnes sont employées à transformer une matière quelconque en article d'usage ou de consommation.”

Cette définition est celle qui a été suivie par les énumérateurs dans le recensement de 1891, comme dans ceux de 1881 et 1871. Le but en vue dans ces trois recensements est le même : obtenir des statistiques complètes sur les petites comme sur les grandes industries du pays. Une des causes principales du développement du pays, durant la dernière décade, d'après les rapports des énumérateurs du recensement, semble être due à la création d'un grand nombre de petites industries. Cette cause caractéristique peut aussi s'appliquer à la décade précédente, mais dans des limites moins étendues.

Les plus grands soins ont été apportés par le personnel du bureau de la statistique, dans la compilation des rapports des énumérateurs. Ces rapports contenaient plusieurs petites industries dont il n'est tenu aucun compte dans le présent volume, vu que ces industries ne formaient que de faibles accessoires aux occupations régulières desquelles l'ouvrier tire son existence. En cela on a suivi fidèlement les voies adoptées par les recensements précédents, le but étant de mettre le recensement de 1891 en état d'être comparé, dans ses résultats généraux, avec ceux de 1871 et 1881.

Le présent rapport ne contient pas les produits fabriqués dans les familles pour des fins domestiques, tels que les lainages et les toiles, ainsi que le beurre et le fromage faits dans les familles.

On verra l'étendue de ces industries par les chiffres suivants : 4,320,838 verges de lainages, 633,724 verges de toile, 111,370,210 livres de beurre et 6,267,203 livres de fromage ont été fabriquées durant l'année du dernier recensement dans les familles canadiennes ; ces produits domestiques ne sont pas donnés dans le présent rapport. Il en est de même pour les autres produits domestiques, tels que meubles, chaussures, etc., faits dans les familles, durant les heures de loisir, pour des fins domestiques.

D'un autre côté, l'industrie de modiste suivie, comme moyen d'existence, par un grand nombre de personnes, devait nécessairement trouver sa place dans un recensement dont le but était de montrer, aussi complètement que possible, les résultats obtenus par les ouvriers du pays.

Un trait digne de remarque dans les rapports des établissements industriels, pour l'année 1891, c'est la manière dont les industries ont été spécialisées. Bon nombre d'industries qui, en 1881, étaient données comme appartenant au même établissement, ont été sépa-

Many industries, which, in 1881, were under one establishment, had become separated in the ten years. One example will suffice to show the extent of this movement. In 1881 there were 1,180 bakeries returned for the Dominion. In 1891 there were 1,656 bakeries and 280 confectionery-making establishments. Included in the 1,180 bakeries were all the confectionery-making establishments, and these were so included because, taken generally, the two industries were carried on under the same management. In 1891, specialization had made such progress that the enumerators returned 280 establishments in which confectionery-making was the sole business.

In many cases, therefore, there were two establishments in 1891, where there was but one in 1881, the two doing, possibly, no larger business than the one did in 1881.

The movement towards specialization explains, in part, the great increase in the number of industrial establishments during the ten years.

There is no doubt that the ten years saw a large increase in small industries. These have been established all over the country. They have taken root, and time will show whether they will follow the rule of other countries and develop into large establishments.

As a feature in the industrial life of the people this revelation of the census deserves to be recorded. It is a great fact and should not be ignored. It is registered in the census returns so that in after years, when there shall come development of large establishments, the people of Canada may be able to look back upon the period of "small and feeble things," and show from what humble beginnings the industrial life of the country sprang.

Many and very great difficulties surround the effort to take the industrial establishments of Canada under the definition which has been in force for three census-takings. It did not, however, seem possible to depart from the principle established in former censuses. In order to reduce to a minimum the objections to such a minute investigation as the definition called for, the Statistical Division is engaged in making a classification of the industrial establishments as recorded in the censuses of 1881 and 1891 on the basis of value of output. The classes into which the returns are divided are:—

Industries having an output under.....	\$ 2,000
“ “ “ from.....	2,000 to \$12,000
“ “ “	12,000 “ 25,000
“ “ “	25,000 “ 50,000
“ “ “ over.....	50,000

This classification it was hoped would be finished in time for publication in the present volume, but unavoidable delays have prevented and it has been deemed better to publish Vol. III. without the analysis on the basis mentioned rather than wait longer.

rées durant la dernière décade. Un exemple suffira pour montrer l'étendue de ce mouvement. En 1881, 1,180 boulangeries ont été rapportées par les énumérateurs du recensement pour le Dominion. En 1891, il a été fait rapport de 1,656 boulangeries et de 280 confiseries. Les établissements de confiserie, en 1881, se trouvaient compris dans les 1,180 boulangeries, vu que la plupart de ces établissements étaient alors conduits par une même administration. En 1891, la séparation d'industrie avait fait tant de progrès que les énumérateurs ont rapporté 280 établissements dans lesquels la confiserie était l'unique industrie. Dans bien des cas, par conséquent, deux établissements ont été rapportés séparément en 1891 là où il n'a été fait rapport que d'un seul en 1881. Le mouvement tendant à spécialiser ou séparer les industries, explique en grande partie l'augmentation considérable dans le nombre des établissements industriels durant la dernière décade. Il n'y a aucun doute que ces petites industries ont augmenté considérablement durant les dix années en question. Il en a surgi dans tout le pays. Elles ont pris racine, et l'avenir dira si elles ont suivi ici la règle suivie par elles dans d'autres pays, en se développant en établissements plus considérables.

Comme trait de la vie industrielle du peuple canadien, cette révélation du recensement mérite d'être mentionnée. C'est un fait important qui ne devrait pas être ignoré. Il est enregistré dans les archives du recensement, afin que plus tard, quand le développement en de grandes industries se sera accompli, le peuple canadien puisse jeter un regard en arrière sur la période des "petites et faibles choses," et montrer de quels humbles commencements la vie industrielle du pays est sortie.

De grandes difficultés ont accompagné les efforts qui ont été faits pour obtenir un état des établissements industriels du Canada, tel que voulu par la définition des trois derniers recensements. Il n'a pas été possible, cependant, de s'éloigner du principe établi par les recensements précédents. Afin de réduire à leur plus simple expression les objections que renferme cette définition, le personnel du bureau de la statistique est actuellement à faire une classification des établissements industriels, tels que rapportés dans les recensements de 1881 et 1891, classification basée sur la valeur des produits manufacturés, dans l'ordre suivant :—

Industries ayant produit	au-dessous de.....\$	2,000
"	"	de..... 2,000 à \$12,000
"	"	" 12,000 à 25,000
"	"	" 25,000 à 50,000
"	"	au-dessus de 50,000

On espérait que cette classification serait terminée à temps pour être publiée dans le présent rapport, mais des retards inévitables ayant arrêté le progrès de ce travail, on a cru qu'il serait préférable de publier le volume III sans cette analyse, plutôt que d'attendre plus longtemps.
